**Product Description:** ACT! Hotlinks is a fully-integrated product providing a "hot" exchange of customer information between ACT contact management from Symantic and Microsoft Great Plains Solomon. ACT Hotlinks allows users to effortlessly transfer all of the necessary customer information from an ACT contact file directly into Solomon IV 4.5. This process eliminates the need to re-enter customer information into Solomon Sales Order Entry when a prospect becomes a sale. Installation of ACT Hotlinks causes new icons to be added to the ACT Toolbar. A simple click on this icon activates the interface to Solomon IV 4.5. Hotlinks provides a seamless interface to Solomon IV A/R, Order Processing, Purchasing, and Inventory modules.

**Product Type:** Solomon IV 4.5 Utility    **Customization Manager Enabled:** Yes

**Technical Requirements:** Technical requirements are the same as for Microsoft Great Plains Solomon. Developed using VB RDT. The release diskette contains all tools for installation and executable function.

**Product Availability:** Shipping for Version 4.5

**Features/Benefits:**

- ◆ **Provides direct interface** to the Sales Order Maintenance and Customer Maintenance Screens
- ◆ **DDE populates** the Solomon IV 4.5 Screens
- ◆ **Updates** Solomon Customer database if customer does not exist in Solomon IV 4.5
- ◆ **Inquiry by Customer** screen shows both sales information by customer and purchase information by item
- ◆ **Inquiry by Part Number** screen shows sales information to all customers and purchase information from all vendors. Inquiries can be used without connection to ACT Contact Management
- ◆ **Pricing:** Call for pricing and information on reseller programs
